

## Introduction

---

The eNodeB Functional Tester is an automated test suite for testing the correctness of an implementation of LTE evolved NodeB (eNodeB) according to 3GPP TS 36.413 (S1 Application Protocol), TS 36.331 (RRC), TS 36.323 (PDCP), TS 24.301 (NAS) and other relevant Release 8 standards.

## Version 1.0.0.0 Beta

**Release Date:** Sept 15, 2010

## Component Versions

---

1. eNodeB Functional Tester : 1.0.0.0
2. Test Executive : 2.0.0.12
3. eNodeB Functional Tester Test Procedures : 1.0

## Known Issues
